Lewiston, Idaho

ONLINE FEMALE SALE

Bidding opens 11/13/2025 at 8am PST

Closes 11/15/2025 at 12pm PST

DVAuction
Broadcasting Real-Time Auctions

Sale Information

This is a timed auction on DVAuction, bidding will open 11/13/2025 at 8 a.m. PST and will close 11/15/2025 at 12 p.m. PST. All lots for this event will close at the same time.

Contact

Office.....208-743-5517
Jason Beck - Cattle Manager.....208-790-0646
Gracie Beck.....208-791-7926
redangus@wvmccann.com

Health

We guarantee that all sale cattle will ship to any state, the health of the herd is excellent. All bred females were preg checked on 9/8/2025 by Dr. Shelley O’Connell. Lewiston Veterinary Clinic - (208)-743-6553

Terms

McCann Red Angus reserves the right to two future flushes on any female sold at the sellers expense and the buyer’s convenience.

Delivery

McCann Red Angus will offer free delivery up to 200 miles from Lewiston. Cattle will be delivered to central points in adjoining states of Idaho for \$250 per customer. If buyer lives in a state farther then Washington, Oregon, Nevada, Utah, Wyoming or Montana, buyer will pay additional costs per mile over 250 miles from a central point.

Terms of the sale are wire transfers due 11/19/2025, 12pm PST unless other arrangements have been made before the sale with McCann Red Angus. Wire transfer instructions will be sent to all buyers by 11/17/2025.

All cattle are the buyer’s property as soon as sold and will be cared for, for a reasonable length of time at the buyer’s risk.

Immediate delivery to follow the sale.

\$100 credit per animal picked up at the ranch before 11/21/2025.

Embryos

All embryos are stored at Trans Ova Genetics in Richland, WA. Storage and shipping of embryos will be at buyers expense. Each lot will contain 3 embryos. Buyer pays price per embryo not per lot.

Semen

All straws of semen are stored at Genex. Storage and shipping of embryos will be at buyers expense. Each lot will contain 5 straws. Buyer pays price per straw not per lot.

Friends,

Lori and I would like to welcome you to the first McCann Red Angus female sale.

We will be offering open heifers, bred cows, bred heifers, embryos, semen packages, and some fall calving pairs. All of these will be registered Red Angus and anything that is bred will be bred to a top-quality bull. We've worked diligently on our genetics and feel that they are excellent.

Our sale is internet only, but if you have any questions, you can certainly call our son, Jason at 208-790-0646. If you're unable to reach him, you're welcome to call the office at 208-743-5517.

We are extremely proud to be offering this female sale. As I said, it is a first for us, but it is a chance for us to share the excellent genetics that Jason has put together with other breeders of the Red Angus breed. Please review our website and many of you will receive this catalog, which will give you additional information. We stand available to answer any questions you may have.

Looking forward to you supporting our sale and adding some of our excellent genetics to your herd.

Sincerely,

Bill Jr., Lori McCann and the McCann Red Angus family

Gracie, Jason, Kylee and Halle Beck

Lori and Bill Jr. McCann

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
