Payment

Internet & phone buyers - Must make payments via wire transfer or check 3 days post sale.

All invoices will be emailed Friday 27, 2026.

McCann Red Angus policy requires that all sales be settled at the end of the sale or within 5 days if prior arrangements have been made.

Herd Health

Herd health is monitored by Lewiston Vet Clinic in Lewiston, ID. All cattle will be accompanied by proper health certificates for shipment and have had a complete vaccination program. Bulls will have passed a breeding soundness exam and fertility test prior to the sale.

Guarantee

The sale offering is guaranteed to be fertile and reproductively sound in accordance with the terms and conditions as recommended by the Red Angus Association of America. If a guarantee situation occurs, the buyer will have the option to select a suitable replacement (if available) or take a sale credit. All bulls are guaranteed through the first breeding season which is considered to end September 1 of the year of purchase and any claims need to be made by that date.

Liability

All persons who attend the sale or view the cattle do so at their own risk. McCann Red Angus, McCann Ranch and Livestock Co. and Lewiston Roundup Association assume no liability - legal or otherwise- for any accidents that occur on sale or viewing premises.

Semen Intrests & Possession

McCann Red Angus is retaining 1/3 revenue sharing semen interest in every bull selling in this sale. This gives McCann Red Angus the option to collect, use and market semen from any bull at the expense of the seller at the convenience of the buyer. There is no guarantee on bulls to freeze semen unless specific terms are agreed to prior to the sale. McCann Red Angus reserves the control of sale and distribution of all semen sold on co-owned bulls. Buyers will be compensated upon receipt of payment for semen sold.

WELCOME to our 6th annual Red Angus Bull Sale. It's been such a pleasure and enjoyment for our family to get to know so many wonderful people involved with the Red Angus breed!

As you know, our sale moved last year from Billings to the Roundup Grounds, here in Lewiston, Idaho. Bulls will be at the grounds for you to view on the 25th of February, and of course, the sale will begin at 1:00 p.m. on the 26th. We are proud of this pen of bulls, as they are second to none. They cover a wide diversity from yearlings, easy calvers, to age advantaged bulls, that we know, without question, will help grow your bottom line. This offering gives you many choices when it comes to your needs for your herd.

In November we had our first female sale, which worked out well for everyone. We sold heifers, some cows with calves at their side, along with some bred cows. In addition, we offered straws of semen and embryos. The sale was a success, and we delivered females throughout the West.

All four of our kids are doing well. Mindy is still with social services in the state of Oregon, Bill is the computer programmer, Aaron is in commercial sales, and Jason, of course, runs the cattle. Our 11 grandchildren range in age from 33 to almost 4 and continue to bring Lori and I extreme joy. This is Lori's 5th year in the Idaho House of Representatives, and she recently announced her run for the Idaho Senate in the May primary. It's a challenge for our family with her being gone while we prepare for the bull sale, but it's something she truly enjoys, and we know she is making a great impact on the state of Idaho.

Special thanks to Jason for all he does with our bulls, along with the entire herd. He is the guy that selects what we feed the bulls, how we take care of them, and what sires he desires to pair with our cows. The rest of us just show up to help work them, haul hay, and move cattle. We hope you will take a moment during the sale to meet Barrett, who has been with us since December 2024. He does an excellent job with the cattle and has helped Jason get the bulls to where they are today. As you can see, these bulls have developed well for us this year. Jason spent time visiting with a nutritionist and we've come with a new ration this year of hay, haylage, corn, and minerals, all of which has contributed to the outstanding growth we have seen in these bulls. As you know, McCann Red Angus bulls are built for all conditions, climates and topography from hills to plains. These guys are not pampered and kept in a small pen. They are muscled up and ready to get to work as soon as they are sold and delivered to you. We are truly excited about this pen of bulls and for your opportunity to add a few to your operation.

On behalf of our family, Lori and I want to welcome you to this, our 6th Annual Sale. We hope you will join us on Wednesday, the 25th, for a prime rib dinner, and of course, lunch on the 26th, prior to the sale beginning at 1 p.m. We look forward to seeing you in February.

Bill Jr.

Gracie, Halle, Jason, and Kylee Beck

Thank you for taking the time to consider our cattle!

We look forward to visiting with old friends and making new ones in Lewiston, ID February 26, 2026

McCann Red Angus offers free delivery in Idaho. Adjoining states and beyond will be delivered to central points at buyers cost.

- \$150 discount per bull will be given if you haul your own bull sale day
- \$100 refund per bull if picked up at the ranch prior to March 15, 2026. Refund will be mailed following owner taking possession.

Yearling Bulls

Lot 1 - Lot 59

This offering of yearlings combines balanced growth, sound structure, and genetic value. Developed with efficiency and longevity in mind, these bulls are well-suited to add performance and consistency to a wide range of operations.

Why use a Black Red-Carrier Bull?

You can introduce new red genetics into your herd without immediately changing hide color. When breeding two black-hided red-carrier animals together, you have a 25% chance of producing a red calf.

Lot 1

One of this year's true standouts, 5031 has exceeded every expectation we have had of him. Born at 79 lbs, he weaned at an impressive 787 lbs and is now, at a year pushing 1,400 lbs! with elite pedigrees on both sides, there is no doubt he's the real deal.

*One of my favorite heifer bulls we have to offer out of
extremely good cow families!*

BW 72 WW 700

MCCann Blue Collar 3083 is not a bull we intended on using, he fell into our line up by surprise. He is a bull that did not sell in our 3rd production sale that we decided to use in our herd and we couldn't be happier with the results.

Lot 56

These Copperhead sons are an outstanding option for the commercial cattlemen looking to add pounds and performance to their calf crop. Calves come easy with lighter birth weights then take off with explosive growth and extra pay weight.

Our Feed Program

Our bulls are developed with longevity, structural soundness, and real-world functionality as top priorities. They are grown on a low-starch, high-roughage ration designed to promote steady, durable growth rather than pushed, over-conditioned performance. This approach allows for proper skeletal and muscle development while helping ensure bulls remain athletic, sound, and ready to go to work in a variety of environments.

Our feeding program is supported by a complete mineral package to promote proper development, structural integrity, fertility, and overall health. The ration was carefully developed and is consistently managed by Jason, whose attention to detail and commitment to the program helps ensure cattle receive a balanced, consistent diet every day. His hands-on approach plays an important role in developing bulls that are built to last and perform for our customers.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Age Advantage Bulls

Lot 60 - Lot 83

This offering of slightly older bulls provides added maturity, muscle, and breeding readiness. With extra development time, these bulls offer confidence for buyers looking for durability and immediate service ability.

Why use a Black Red-Carrier Bull?

You can introduce new red genetics into your herd without immediately changing hide color. When breeding two black-hided red-carrier animals together, you have a 25% chance of producing a red calf.

These bulls are out of the same genetic program ~ we're simply still waiting on DNA results on the dams. We have elected to sell these bulls as 50% commercial, as DNA information is updated we will transfer and update the paperwork accordingly along with updates to our website and on sale day. They will all sell as 50%.

If you have any questions, call our office at 208-743-5517 or Jason at 208-790-0646.
